

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application.

1-5. (Cancelled)

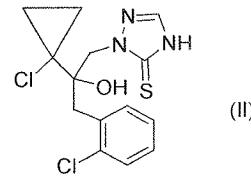

6. (Currently amended) An active compound combination consisting essentially of a compound of formula (I)

(trifloxystrobin)

and

a compound of formula (II)

(prothioconazole)[[.]]₂

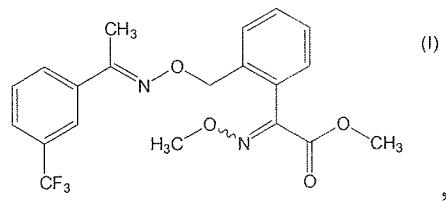

in which the weight ratio of the compound of formula (I) to the compound of formula (II) is from 1:0.02 to 1:20.

7. (Currently amended) An The active compound combination according to Claim 6 in which the weight ratio of the compound of formula (I) to the compound of formula (II) is from 1:0.02 to 1:20 1:0.05 to 1:10.

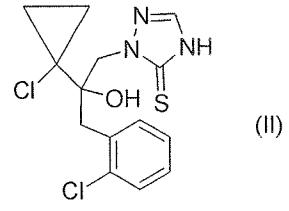

8. (Previously presented) A method for controlling fungi comprising applying an effective amount of an active compound combination according to Claim 6 to the fungi and/or their habitat.

9. (Previously presented) A process for preparing a fungicidal composition comprising mixing an active compound combination according to Claim 6 with one or more extenders and/or surfactants.

10. (Currently amended) A fungicidal composition, comprising trifloxystrobin of formula I

prothioconazole of formula II

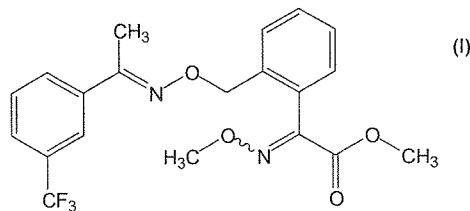

and, optionally one or more extenders and/or surfactants, wherein the weight ratio of trifloxystrobin of formula I to prothioconazole of formula II is from 1:0.02 to 1:20.

11. (Cancelled)

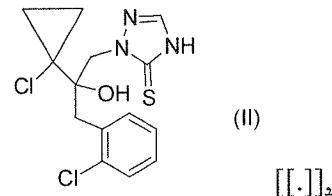

12. (Previously presented) The fungicidal composition as claimed in Claim 10, wherein the weight ratio of trifloxystrobin of formula I to prothioconazole of formula II is from 1:0.05 to 1:10.

13. (Previously presented) The fungicidal composition of Claim 10, wherein said composition contains one or more extenders which are solid or liquid carriers.

14. (Currently amended) A method for controlling phytopathogenic fungi, which comprises treating said phytopathogenic fungi, their environment, habitat or the plants, parts of plants, seeds, soils, or storage areas, with an anti-fungal effective amount of trifloxystrobin of formula I

and prothioconazole of formula II

wherein the weight ratio of trifloxystrobin to prothioconazole is from 1:0.02 to 1:20.

15. (Previously presented) The method of Claim 14, wherein said compounds are applied to said soil or parts of plants in a total amount of between 0.1 g/ha and 10,000 g/ha.

16. (Previously presented) The method of Claim 14, wherein said compounds are applied to said parts of plants in a total amount of between 10 g/ha and 1,000 g/ha.

17. (Previously presented) The method of Claim 14, wherein said compounds are applied to said soil in a total amount of between 1 g/ha and 5,000 g/ha.

18. (Previously presented) The method of Claim 14, wherein said compounds are applied to said seeds in a total amount of between 0.001 g and 50 g/kg of seed.

19. (Previously presented) The method of Claim 14, wherein said compounds are applied to said seeds in a total amount of between 0.01 g and 10 g/kg of seed.
